HANDCRAFTED HAVEN IN COLORADO

Crestron Home® OS delivers a cohesive fusion of rustic design and smart technology.

Nestled in the scenic Fox Hill community of Franktown, Colorado, this custom-built home beautifully captures the essence of rustic charm and sustainable living. Thoughtfully designed to reflect the values of community and craftsmanship, the residence blends natural materials and handcrafted details to create a warm, inviting atmosphere.

Quality Audio Video

"CRESTRON WAS ABLE TO PROVIDE TECHNOLOGY THAT NOT ONLY PROVIDED THE HOMEOWNERS WITH COMPREHENSIVE CONTROL BUT ALSO MATCHED THE AESTHETICS OF THE HOME."

Tyson Rabani
CEO,
Quality Audio Video

CRESTRON

THE CHALLENGE

The homeowners sought to create a home with unparalleled convenience, security, and entertainment potential while preserving the traditional communal experience of the neighborhood. The technology needed to complement their lifestyle by enhancing their daily routines and leisure activities.

THE SOLUTION

Quality Audio Video (QAV) was involved from the beginning, allowing the team to seamlessly integrate technologies from the ground up and ensure a cohesive and thought-out implementation. The QAV team chose the Crestron Home® OS to blend advanced technology with the home's unique design.

"BASED ON THE HOMEOWNERS NEEDS AND WANTS, CRESTRON HOME WAS THE IDEAL CHOICE. WE COULD FULLY TAILOR THE SYSTEM TO MATCH THEIR ROUTINES AND LIFESTYLE."

Quality Audio Video

CRESTRON

THE TECHNOLOGY

Crestron Home OS proved to be the best option due to its centralized control over the home's various environments. Throughout the home, there are sophisticated lighting and climate control systems, advanced security features, and high-quality audio and visual setups designed for entertainment and relaxation. The Crestron Home system can be used to adjust the lighting, shades, and climate control to suit the homeowner's preferences at different times of the day for daily routines like 'Good Morning' and 'Good Night'.

The home theater uses Crestron DM NVX® AV-over-IP technology and Crestron DM NAX® Audio-over-IP technology, allowing the family to enjoy an immersive experience. The custom, hand-crafted Leon Edge Media Frame on the TV matches walnut wood from the family farm, adding a personalized touch. The Crestron DM NVX and DM NAX platforms distribute video and audio throughout the home, which is ideal for entertainment settings. The family also has a record player in a dedicated listening room connected to the DM NAX system.

With the home's vaulted ceilings, motorized window treatments were installed so the homeowners can easily manage natural light and privacy. The shades add to the homeowners' sustainable living by letting sunlight in in the winter or keeping the home cool in summer by closing the shades. One of the most unique additions was the modern "dinner bell" system that allows communication between the main house and the woodworking shop, exemplifying the blend of tradition and innovation.

"THE ABILITY TO CONTROL THINGS REMOTELY – WHETHER WE ARE ON THIS CONTINENT OR IN THIS STATE, OR WHEREVER – IT'S NOT JUST ONE PIECE OF EQUIPMENT, IT'S THE WHOLE CRESTRON INTEGRATION. IT HAS MADE US MORE COMFORTABLE, ABOVE AND BEYOND WHAT WE WERE THINKING."

Homeowner

CRESTRON

RESULTS

Crestron technology helped elevate the homeowners' experience while preserving the rustic charm that defines the residence. With remote access to their system, the homeowners enjoy peace of mind no matter where they are.

"A high level of coordination was essential to merge the technology elements with the home's handcrafted features, creating an advanced, yet aesthetically pleasing, space," says Tyson Rabani, CEO at QAV.
