Crestron Lighting Control Helps City of Dreams Become a Shining Star

Located in the heart of Cotai in Macau, City of Dreams is Macau's most unique and grandest entertainment resort. Combining electrifying entertainment, a diverse choice of accommodations, international dining, designer shopping and a spectacular casino, the resort is anchored by world-class hotels to create an exceptional leisure destination for visitors from Asia and

Crestron audio/video and lighting control technology automate the suites, villas and boardrooms of Hard Rock Hotel and Crown Towers.

Hard Rock Hotel Suites Jam with Crestron Home Entertainment and Lighting Control

Rock Star Suites at the Hard Rock are all about attitude, style and sophistication. Blending the legendary rock and roll lifestyle with ultra-chic details, these contemporary suites feature sensational designer décor with advanced Crestron control of lighting and entertainment systems.

A Crestron Adagio Media System (AMS) combines a home entertainment system and a control system in one powerful component to streamline and automate all entertainment and lighting control in suites. The suites and boardrooms, which include LCD TVs, projectors, a Blu-ray player, DVD player, music server, and 94" screens for presentations, offer guests both leisure and business amenities and the lighting system. Plus, a CENI-IDOC iPod docking solution enables guests to distribute music from their personal iPod throughout the suite. TPMC-8X WiFi wireless

around the world.

City of Dreams also includes a beautiful mega casino, more than 20 restaurants and bars, over 200 shopping facilities, and The Bubble, a spectacular audio visual multimedia theatre. The "City" is constructed in the style of a podium, with four towers including a Hard Rock Hotel, Crown Towers, and two towers of Grand Hyatt Macau.

and TPS-6L wall mount touchpanels provide convenient one-touch room control, such as activating custom lighting presets for desired ambiance, or routing video and audio sources to desired locations within the room.

Villas at Crown Towers

Villas are the epitome of contemporary luxury and opulence with unrivalled views of Cotai. This villa features a separate lounge room, a dining room, living rooms, bedrooms and a large multi-function room. Crestron Adagio AMS is the brain of this integrated AV solution, accessing and controlling each audio, video, and environmental element, including lighting control, entertainment, a karaoke system, thermostats and drapes.

In the multi-function room and living rooms, guests are spoiled with touchscreen control for selection of their favorite movies or music on a state-of-the-art home theatre system and CEN-IDOC iPod docking station. With a single touch on TPMC-8X wireless touchpanel, the lights dim, the shades close, the plasma turns on, and the Blu-ray Disc player starts the selected movie.

Lighting and drapes are controlled by a PAC2M processor, CLXI-1DELV4 4-channel electronic low-voltage dimmer module, CLXI-1DIM4 4-channel dimmer module and CH-HREL8-D6 high voltage relay module. Cameo keypads allow guests one-touch freedom to adjust lighting scenes and drapes/sheers for the ideal ambiance for any occasion. A master key at the main entrance is provided for master on/off all the lights and air conditioning, providing the ultimate in convenience, comfort and energy efficiency.

Boardrooms

The boardrooms accommodate an array of gatherings with meeting spaces to suit any size group. Flexible configurations are available in theatre, classroom and U-shaped style seating. A Crestron CP2E control system enables integrated control of multimedia presentation systems and lighting. A complete selection of media amenities includes projectors, screens, switchers, video conference systems, Blu-ray/DVD players and more, and are controlled from TPMC-8X and TPS-6L touchpanels, providing presenters with full room control at their fingertips.
