Crestron Zūm: Lighting Control Systems for a New Generation

Lighting Control Made Easy

Crestron Zūm lighting control systems cover all your requirements on a single platform. With simple design, installation, control and unparalleled scalability, Zūm enables you to control lighting in as many — or as few — spaces as required.

Zūm Wired Solutions

Zūm Wired is a distributed lighting control system that uses industry standards such as 0-10V, DALI®, and phase control all merged on an enterprise IoT network, Zūm Net. This network not only provides communication and control of your lighting, but also seamlessly integrates with Crestron Unified Communications systems and 3rd party occupancy, environmental, and acoustical sensors or other data-related IoT devices.

Zūm Wireless Solutions

Zūm Wireless is a distributed lighting control system that uses industry standards, such as 0-10V, DALI, and phase control, and can be managed from a secure wireless 2.4 GHZ network. Zūm Wireless systems are scalable from just a single room with two devices, up to 32,000 devices in 1,000 rooms or spaces occupying up to millions of square feet.

Zūm Hybrid Systems

Built on a distributed architecture, both Zūm Wired and Zūm Wireless products can be mixed in a single system. Perhaps you need wireless interface devices, including keypads or sensors, because of room limitations such as glass walls. Maybe you need to add wireless spaces into a wired system. It doesn't matter. There's a Zūm solution for virtually every situation.

Easy to set up

All Zūm devices – wired or wireless – can be managed from the Zūm App, which makes it easy to set up all room aspects and parameters, including presets, lighting levels, and optimized sensor settings. Spaces or rooms can be saved and used as templates for use in other spaces, which greatly reduces the time required to start up your systems.

Easy to manage

With Zūm, building-wide lighting control is just as easy as in-room control. The ZUM-HUB4 control processor (a component of any ZUML control panel) can manage systems with up to 32,000 devices over millions of square feet! The Zūm Hub provides master time clock schedules, demand response, BACnet communication integration, device management (including battery life), as well as uplink connectivity to Crestron cloud services.

When advanced integration and complex sequences are required, the ZUM-HUB4 now supports a custom program (written in Crestron® SIMPL or SIMPL#Pro) running simultaneously alongside the Zūm Hub's "point-and-click" software.

<u>GLA-US-QUATTRO-COM1-24</u>	Ultra-sonic presense detector, 24V	
<u>GLA-US-HALLWAY-COM1-24</u>	Ultra-sonic hallway presense detector, 24V	
<u>GLA-US-ONEWAY-COM1-24</u>	Ultra-sonic single-direction presense detector, 24V	
<u>GLA-DT-CM-COM1-24</u>	Dual tech corner-mount presencve detector, 24V	
<u>GLA-IR-CM-COM1-24</u>	Passive IR corner-mount presence detector, 24V	

Networked Systems: Control Processor Panels

MODEL	DESCRIPTION	IMAGE
<u>ZUML-HUB4-PAK</u>	The Zūm® Control Processor Panel (CPP) assembly enclosure includes a ZUM-HUB4 processor and a CEN-SW-POE-5 switch allowing dynamic calendar scheduling, control, management, BACnet/IP, and demand response for up to 1000 networked Zum Rooms. No licensing fees or cloud access required.	
<u>ZUML-HUB4-CN-PAK</u>	The Zūm® Control Processor Panel (CPP) with Cresnet® includes a ZUM-HUB4 processor with multiple PoE switches and Cresnet power supplies allowing the head-end control of up to 1000 Zum Rooms in addition to traditional Cresnet devices and control of Crestron MLO or FT lighting relay & dimming panels. No licensing fees or cloud access required.	
<u>ZUML-HUB4-GW</u>	The Zūm® Control Processor Panel (CPP) with Wireless Gateway is comprised of a ZUML-HUB4 control processor, a ZUMNET-GATEWAY for Zum Wireless Devices. No enclosure is included. The Power Supplies are include.	

Networked Systems: Distribution/Expansion Panels

(No Processor Included)

MODEL	DESCRIPTION	IMAGE
<u>CLP-HUB-SW-POE-10</u>	CLP Lighting Network Expansion Panel with 7 PoE Ports for expansion.	
<u>CLP-HUB-SW-POE-5</u>	CLP Lighting Network Expansion Panel w/ Ethernet-to-Cresnet® Bridge, 2 Cresnet Subnets, & 3 PoE Ports for expansion.	
<u>CLP-HUB-SW-POE-16</u>	CLP Lighting Network Expansion Panel with Ethernet-to-Cresnet® Bridge, 2 Cresnet Subnets, & 14 PoE+ Ports for expansion.
