Modular Approval. Power listed is conducted. Output power as shown in this filing is reduced at upper channels for compliance with restricted band-edge requirements. Device must operate with a source-based, time-averaged duty cycle not to exceed 13%, controlled by firmware or software. This modular approval is limited to products operating as mobile or fixed transmitting device. The antenna(s) used for this transmitter must not be collocated or operating in conjunction with any other antenna or transmitter, except as evaluated in this filing. End-users must be provided with transmitter operation conditions for satisfying RF exposure compliance. Separate approval is required for all other operating configurations, including portable configurations with respect to 2.1093 and different antenna configurations.
