

Keyboard/Mouse Cable: SP-CBL

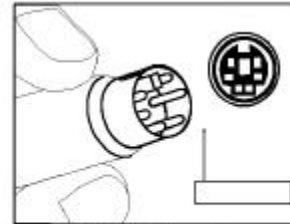

The SP-CBL cable allows the SmartPresenter™ system to communicate with a PC through the keyboard or mouse port. Since the SmartPresenter system can be configured to produce keyboard and mouse commands, this cable makes the physical connection from the SP-1 to the PC.

Cable Connection

The illustration shown provides basic cable connection directions. Refer to the SP-1 *Operations Guide* (DOC. 5712) for more detailed information.
