

SmartPresenter™ Carrying Case: SP-CASE

The SP-CASE has been designed as a carrying case for the SmartPresenter system. Its lightweight, hard-shell plastic construction offers maximum protection. The pre-cut foam included with the case has provisions for the SmartPresenter system hardware and accessories.

Instructions

The illustration below shows the provisions for the SmartPresenter system hardware and miscellaneous accessories. Place the system components in the designated area. The pre-cut foam securely holds the components in place.

SP-Case: System Component Locations

NOTE: Before traveling with the SP-CASE, make sure it closes completely and both cover clips are secured in the closed position.
