- *3.5 mm line-in port for connecting a turntable or other device*
- *Orientation sensing for smart stereo sound*
- *Easy integration with Crestron® control systems and Crestron Home™ systems*
- *Expansively controllable using Crestron TSW series touch screens^{1,2}*

Sonos is the world's leading wireless Home Sound System that fills all the rooms in your home with high-quality streaming music, movies, and TV. Sonos streaming music players and wireless speakers fit cohesively with Crestron® home automation solutions, allowing touch screen access to a wide variety of streaming music services, and enabling audiophile-quality wireless audio throughout the home. To simplify purchasing and integration of our combined powerhouse technologies, Crestron is proud to offer the complete line of Sonos products, now available for purchase through Crestron dealers (in the United States only).

Immerse yourself in music and more with Five, the high-fidelity speaker for superior sound, tuned by renowned producer Giles Martin. Experience deep bass and an ultra-wide soundstage. Use the 3.5 mm line-in port to connect your turntable or another device, and enjoy simple control with the Sonos app or Apple® AirPlay® 2 software.

Deep Bass

Five's acoustic design features three high-excursion woofers within a sealed architecture that eliminates cabinet resonance.

Ultra-wide Soundstage

Two precisely-angled side tweeters create spatial extension and rich stereo sound, while a center tweeter optimizes vocal playback.

Smart Stereo Sound

Place a single speaker horizontally for stereo sound. Pair two speakers in an upright position and each speaker will automatically adjust to receive a mono feed of the left or right channel audio for more detailed stereo separation and an even wider soundstage.

Line-in and Play

Connect your turntable, CD player, or other device directly to Five using the 3.5 mm line-in port.
