

Network AV Any content anywhere

With DM® network AV you can share content from the room or space you're in with any other room or space, and vice versa – without a matrix switcher. Now, that's flexibility. The unique DM encoder/decoder makes it simple.

Use a DM-TX-RX-100-STR encoder/decoder in each room to provide two-way interaction with multiple rooms. Pair it with an HD-MD-400-C-E auto-switcher extender to make simple rooms even more powerful.

Network AV Any content anywhere

With DM® network AV you can share content from the room or space you're in with any other room or space, and vice versa – without a matrix switcher. Now, that's flexibility. The unique DM encoder/decoder makes it simple.

Use a DM-TX-RX-100-STR encoder/decoder in each room to provide two-way interaction with multiple rooms. Pair it with a DMP53 Series presentation switcher to accommodate multiple local sources, audio switching, .AV Framework™, and the addition of touch screens and robust control.
