TST-600-DS

Table Dock for TST-600 & TST-602

The TST-600-DS is the table dock that is included as standard with the TST-600 and TST-602 Wireless Touch Screens. It provides a convenient solution for charging the touch screenís internal battery. It is also available separately as an add-on accessory for the TST-600-WALL and TST-602-WALL Wall Mount Wireless Touch Screens to provide an alternate tabletop charging option.

The TST-600-DS features a low-profile design, allowing it to fit easily in a cabinet or drawer, or on a countertop or side table. Its angled cradle facilitates full use of the touch screen while charging. It can also provide a wired Ethernet connection for the touch screen while docked.

For easy, versatile placement, the table dock features a single flexible hookup cable. The 9 ft (2.75 m) cable extends from the rear of the table dock to a compact interface module (TST-600-IMCW, included), which may be installed in a wall-mounted electrical box, or attached to any flat surface or a single rack rail. The interface module provides wired connections for power and Ethernet.[1]

The optional swivel mount kit (TST-600-SMK, sold separately) allows the table dock to be affixed to the tabletop, with the ability to rotate it up to 330 degrees.

SPECIFICATIONS

Note: See also TST-600-IMCW for additional specifications.

Connectors

Integral 9 ft (2.75 m) cable with 10-pin RJ50 male connector; Connects to TST-600-IMCW interface module (included)
