

## Statement of Memory Volatility for DM-MD6x4

### Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off Note 1	User data Note 2	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1.FLASH PROM U11	128 kilo Bits	System Config	Yes	No	Special software required	N/P
2.SDRAM U45	512 Mega Bits	Temporary Storage	No	No	Special software required	
3.FLASH PROM U44	16 Mega Bytes	Firmware	Yes	No	Special software required	N/P
4.FLASH PROM U79	1024 kilo Bits	Firmware	Yes	No	Special software required	software
5.FLASH PROM U71	1024 kilo Bits	Firmware	Yes	No	Special software required	software
6.FLASH PROM U83	1024 kilo Bits	Firmware	Yes	No	Special software required	software
7.< >	kilo Bits	< >	< >	< >	< >	software

Note 1: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet retain after power down?

Note 2: Can user data, i.e. Audio or Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.
