

# Wall Plate Media Center Microphone Input: QM-WMIC

## Purpose

The purpose of this addendum is to provide correction to errant information in the original QM-WMIC Operations & Installation Guide (Doc. 6245). Specifically, this addendum adds and corrects specifications for the Microphone Input Levels listed on page 3.

## Correction for Microphone Input Level Specifications

The specification table on page 3 is missing dBu specifications for the XLR Input Level Range on the QM-WMIC. It also lists incorrect dBu values for the 1/4" Input Level Range on the QM-WMIC. The specifications for "Input Level Range" should read as:

### *Updated Input Level Range Specification Showing Correct dBu Values*

SPECIFICATION	DETAILS
Input Level Range XLR	-60 dBV to -20 dBV (-58 dBu to -18 dBu)
1/4"	-28 dBV to +12 dBV balanced (-26 dBu to +14 dBu) -28 dBV to +6 dBV unbalanced (-26 dBu to +8 dBu)  Max. Input: 4 Vrms balanced 2 Vrms unbalanced
