

30 Function Hand-Held IR Transmitter: CNIRHT-MM

Overview

This document provides updated and/or new information for the 30 Function Hand-Held IR Transmitter. This information pertains specifically to the CNIRHT-MM Operations Guide, Doc. **8171**, dated **06.01**. For the document number and date, refer to the bottom-right corner of the rear cover of the original guide.

Purpose

This addendum provides information that has been revised to the “Set or Display Transmitter ID via Keypad Buttons” procedure, which begins on [page 4](#) of the guide.

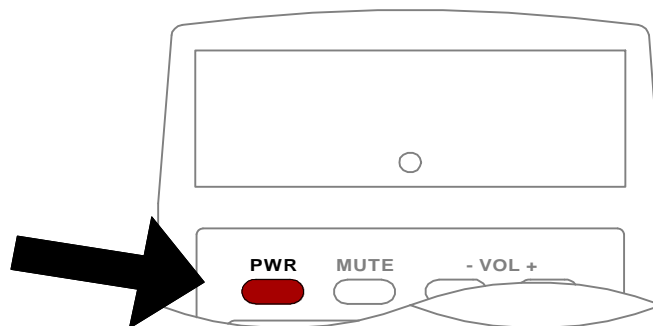

The first sentence of step 3 of the procedure is currently published as follows:

3. To establish a “0” key for displaying or setting the Transmitter ID, press and hold **any** button for at least five seconds while re-connecting the battery.

Instead of pressing and holding ANY button, which can occur inadvertently while replacing the battery, only the PWR button may be used to establish a “0” key. The sentence is revised as follows:

3. Refer to the diagram below. To establish a “0” key for displaying or setting the Transmitter ID, press and hold the **PWR** button for at least five seconds while re-connecting the battery.

Transmitter PWR Button

NOTE: The remainder of step 3 and procedure is unchanged.
