NETGEAR's class-leading AV network switches are designed to make integration with Crestron AV-over-IP products as simple as possible. The CEN-SWPOE-48 is a 48 port managed Ethernet switch that provides PoE+ from 40 of its ports. The eight 10 Gigabit Base-X SFP+ ports enable use of transceiver modules to connect to a fiber network.

DM NVX and DM NAX Profiles for Quick Configuration

When configuring a DM NVX or DM NAX system, select the appropriate profile to automatically configure the CEN-SWPOE-48 with the multicast functionality required for AV-over-IP.

Web Browser Interface

Using a streamlined interface, quickly and completely configure individual ports or assign AV profiles for use with DM NVX or DM NAX systems. An advanced command line interface is also available.

Eight SFP+ Ports

All SFP+ ports offer 10 Gigabit Base-X connections with support for both multimode and single-mode fiber transceiver modules, such as the SFP-10G-SR.

Power Over Ethernet+

PoE+ is supplied simultaneously across 40 ports, providing a centralized power source for numerous PoE+ powered devices and eliminating the need for cumbersome power supplies and extra wiring. Up to 30 W is provided per port up to a maximum of 960 W.
