

# Architectural Series Faceplates: CT/LC-FPAR1000

## Description

Architectural Series Faceplates bring a clean, updated look to the CT/LC-1000 series touchpanels. They feature machined aluminum construction with a stylish shape that is a pleasing alternative to traditional flat faceplates, and they are available in a variety of finishes including stainless steel, anodized black, and the standard white and almond. (Refer to the table below.)

Use the following procedure to install the new faceplates. (Refer to the illustration below.)

1. Lift the existing faceplate off the touchpanel. If necessary, use a small flat-bladed screwdriver between the faceplate and the mounting surface, using a gentle twist to free the faceplate.
2. Position the new faceplate over the touchpanel and firmly press the faceplate until it snaps into position.
