

NIKO-BLANK

Blank Wall Plate

Other available colors not shown

- *Seamless integration with CLWI, NIKO, and MPI-WP product ranges*
- *UK and European wall box mountable*
- *Gangable for custom wall applications*
- *Available in Anthracite, Black, Champagne, White, and White Steel*

The NIKO-BLANK houses standby wiring to provide a robust front plate with a universal mechanism that is UK and European wall box mountable.

Mounting

The NIKO-BLANK can be mounted to a European or UK wall box. The NIKO-BLANK can also be flush mounted using the integrated mounting claws, which compensate for irregularities in the drywall. The NIKO-BLANK mechanism includes four grooves for screw mounting on the horizontal or vertical axis, and it includes four screw holes for mounting on panels.

Multi-gang Installation

The NIKO-BLANK can be vertically or horizontally coupled with several plates, switches, or outlets. For vertical coupling, the bases easily slide into each other and automatically lock into place. For horizontal base coupling, the two pre-formed lips at the bottom can be folded down so one mechanism perfectly fits with another.

Specifications

Enclosure

Mounting Requires a 1-gang European (DIN 49073) or UK (B54662) electrical wall box

Construction Rigid PC and ASA;
Self-extinguishing (complies with 650°C filament test)
