

Statement of Volatility

Products: DMF-CI-8

Crestron products may contain volatile memory, non-volatile memory, or a combination of both types. Volatile components (**V**) lose their data upon removal of power from the system. Non-volatile (**NV**) components retain their data even after power is removed from the system.

The products listed above contain the following memory devices:

Memory					
Type (SRAM, DRAM, etc.)	Size	User Modifiable (Y/N)	Volatile/ Non-Volatile (V/NV)	Stores User Data (Y/N)	Process to Clear User Data
SPI Flash	1 Mb	N	NV	N	
SRAM	512 Kb	N	V	N	
STM32 Flash	2 Mb	N	NV	N	

Additional Information: STM32 Flash refers to the Flash memory within the STM32 host processor chip. This processor executes the firmware that manages the DMF-CI-8. It is pre-programmed at the factory.
