

Statement of Memory Volatility for DM-RMC-100-S

DM-RMC-100-S Provides a controller and interface for a high-definition display device as part of a complete DigitalMedia System. It uses the following internal memory type: EEPROM and FLASH PROM. The memory supplied with this product holds only firmware, operational parameters and user presets. No user audio/video data is retained in memory upon power-down.

See table below for memory type and Volatility:

MEMORY TYPE	VOLATILITY	USER DATA
EEPROM	Non-Volatile	NO
FLASH PROM	Non-Volatile	NO
