Network AV Multicast digital signage and IPTV

It's never been easier to distribute AV over the network for digital signage and IPTV applications. From presentation rooms and public spaces, such as employee lounges and cafeterias, to an entire campus, airport, or retail environment, DM® makes it easy to leverage your existing network infrastructure.

Get AV onto the network with the DM-TX-RX-100-STR and distribute to an unlimited number of DM-RMC-100-STR decoders, conveniently located behind each display.
