## Crestron + Amazon

Crestron and Amazon® Alexa® Voice Recognition effortlessly optimize your home and create a luxurious environment that responds to your needs. Together with the Alexa Voice Service, you command your home. Simply say, "Alexa, start my day."

### How do I get started?

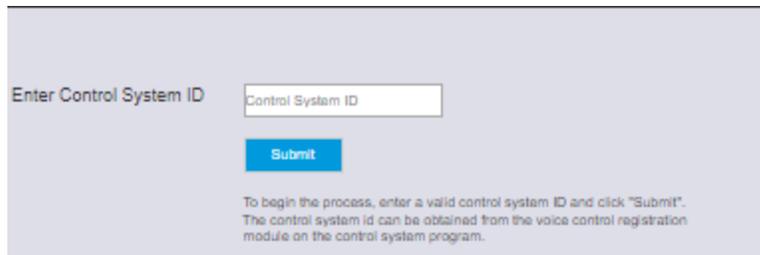

Talk to your Crestron Technology Professional (CTP) to incorporate the Amazon Alexa modules into your program.

Your CTP must do the following:

- Register your Crestron Control System.
  - Browse to the appropriate Crestron Admin Portal for Amazon Alexa:
    - USA/North America: <https://voicereg-a-na.crestron.io/>
    - Europe: <https://voicereg-a-eu.crestron.io/>
    - Asia/Pacific: <https://voicereg-a-apac.crestron.io/>
  - Enter the control system ID (the control system MAC address). A unique code is displayed.

### Crestron Admin Portal for Voice Control Systems

The admin portal is a tool that allows resellers and installers to register a Crestron control system that has been programmed for integration with voice control and to configure accounts to use that system.

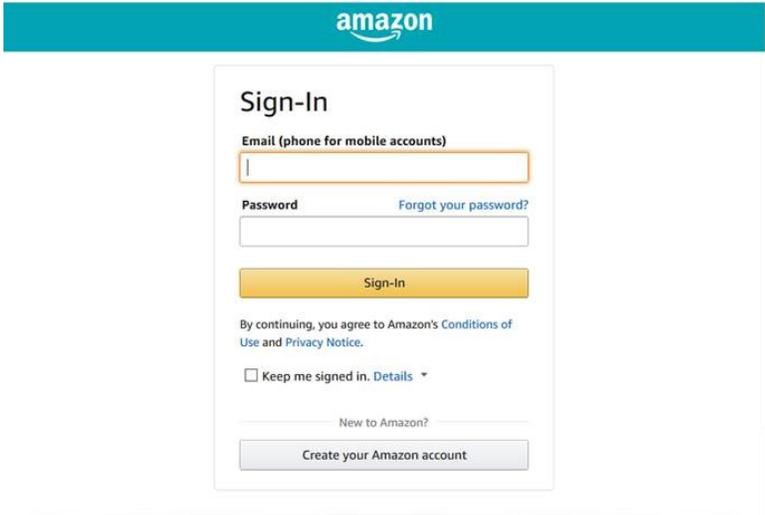

The screenshot shows a web form with the title "Enter Control System ID". It features a text input field labeled "Control System ID" and a blue "Submit" button. Below the form, there is a note: "To begin the process, enter a valid control system ID and click 'Submit'. The control system id can be obtained from the voice control registration module on the control system program."

- Click Register to display a six-digit registration code.

- Connect your Crestron Control System by entering the registration code from the Crestron Admin Portal in the control system. (See Voice Control Registration module.)
- Next, register with your Amazon account
  - Click **Link to Amazon** in the Crestron Admin Portal.
  - When registering US devices, a dialog box is displayed asking whether the linked account is for a smart home or for an Alexa for Business (AWS) account. Click **Smart Home**.

The image shows the Amazon Sign-In page. At the top is the Amazon logo. Below it is a "Sign-In" section with a title "Sign-In". There are two input fields: "Email (phone for mobile accounts)" and "Password". A "Forgot your password?" link is next to the password field. A yellow "Sign-In" button is below the fields. Below the button, there is a link to "Amazon's Conditions of Use and Privacy Notice" and a checkbox for "Keep me signed in. Details". At the bottom, there is a "New to Amazon?" section with a "Create your Amazon account" button.

The Crestron Admin Portal shows green checkmarks when the control system is registered and successfully linked to your Amazon account.

Sample Control System ID: 00:10:7f:34:f3:69

Status

Registration	Control System Connection	Linked to Amazon
 Registered	 Connected	 Linked

Delete 00:10:7f:34:f3:69

## How do I configure my Crestron Control System with my Alexa enabled device?

Configure your Alexa enabled device to communicate with your Crestron Control System.

- Open the Alexa App on your smart device.
- Configure the Crestron for Smart Home and Conference Room skill:
  - Click the menu button and select **Smart Home**.
  - Click **Get More Smart Home Skills** and select **Crestron Electronics** from the list.
  - Allow the Crestron for Smart Home and Conference Room skill to discover your Crestron device(s) by giving Alexa the required command. Say, "Alexa, discover devices."  
When Alexa responds with the number of Smart Home devices it discovers, the Crestron for Smart Home and Conference Room skill is enabled and configured.
- Configure Crestron Home Automation skill (US region only):
  - In the Alexa app menu, select **Skills**.
  - Find the Crestron Home Automation skill and add it to your profile. The Crestron Home Automation skill is now enabled and configured.

The Crestron for Smart Home and Conference Room skill is available in the following regions:

- United States (English and Spanish)
- Canada (English and French)
- United Kingdom
- Mexico
- Brazil
- Germany
- Australia

## How do I control my home using Alexa?

There are two ways to interact with Crestron via Alexa:

1. Crestron for Smart Home and Conference Room skill.  
Read how to use it in Amazon's help section:  
[https://www.amazon.com/gp/help/customer/display.html/ref=hp\\_left\\_v4\\_sib?nodeId=201749260](https://www.amazon.com/gp/help/customer/display.html/ref=hp_left_v4_sib?nodeId=201749260).
2. Crestron's Home Automation skill for Amazon Alexa.  
To start using this skill, all requests must begin with "Alexa, ask Crestron" or "Alexa, tell Crestron" and indicate the room.

### Commands for Alexa:

"Alexa, tell Crestron it's too dark in the kitchen."

"Alexa, tell Crestron it's too bright in the family room."

"Alexa, tell Crestron it's too cold in the dining room."

"Alexa, tell Crestron it's too warm in the basement."

"Alexa, turn on the kitchen light."

"Alexa, turn off the fan light in the family room."

"Alexa, tell Crestron I'd like to read in the bedroom."

"Alexa, tell Crestron I'd like to watch TV in the family room."

"Alexa, tell Crestron I'd like to listen to radio in the master bedroom."

"Alexa, raise the light in the kitchen by 25 percent."

"Alexa, dim the sconce in the family room by 50 percent."

"Alexa, open the shades in the family room."

"Alexa, close the shades in the sunroom."

"Alexa, open the family room shades."

"Alexa, close the sunroom shades."

"Alexa, set the temperature to 70 degrees in the whole house."

"Alexa, raise the temperature in the family room by 4 degrees."

"Alexa, ask Crestron to list the rooms."

"Alexa, ask Crestron to list the presets in the kitchen."

"Alexa, what is the basement thermostat set to?"

"Alexa, what is the bedroom thermostat temperature?"

## What if Alexa says, "OK," but controls the wrong device?

Open the Alexa App on your smart device and check the Dialog History to make sure Alexa heard you correctly. Refer to Amazon's help page if you can't find the Dialog History: <https://www.amazon.com/gp/help/customer/display.html?nodeId=201602040>

- If Alexa heard you correctly, verify with your CTP that what Alexa heard matches what's in your system (room names, device names and preset names).
- If Alexa misheard you, try the request again, speaking slowly and clearly.

## What if Alexa says, "OK," but does nothing?

Open the Alexa App on your smart device and check the Dialog History to make sure Alexa heard you correctly. Refer to Amazon's help page if you can't find the Dialog History: <https://www.amazon.com/gp/help/customer/display.html?nodeId=201602040>

Try asking it in a slightly different way, such as "lights in the kitchen" instead of "kitchen lights."

## What if Alexa says she doesn't understand the request?

Try saying, "Alexa, ask Crestron."

- If Alexa responds with "Welcome to the Crestron Home Automation Skill..." your skill is configured correctly.
- If not, follow the configuration steps described on page 4.

If Alexa continues to misunderstand commands:

- Check the Alexa history and be sure to click **No** to the question "Did Alexa do what you wanted?" to send direct feedback to Amazon so they can improve your experience.
- Reach out to your CTP for additional help.

## What are some of the responses from Alexa I can expect?

### **"OK"**

The request was accepted and is executed.

### **"Error, unknown source detected, please ensure you are using the official Crestron Skill."**

Make sure you have enabled and linked the correct skills, as described configuration steps on page 4.

### **"Sorry, I couldn't find a device with the name [device name] in the room [room name]."**

Contact your CTP to make sure the room name and device name are in your system.

### **"Sorry, I couldn't understand your request."**

Alexa did not understand your request.

### **"Sorry, I found multiple devices with the name [device name] in the room [room name]."**

Contact your CTP to make sure you don't have multiple devices with the same name in a single room.

### **"This device doesn't support that action."**

The action you requested does not apply to the device (for example, trying to dim a switched load).

### **"There was an invalid [parameter]. Here is a list of valid parameters: [list]."**

The parameters in the request are invalid.

### **"There was an invalid value for [parameter]. The minimum valid value is [min] and the maximum valid value is [max]."**

The value you provided in your request is outside the acceptable range. Try a value within the range provided by Alexa.

### **"Please contact the installer or reseller to link your account to your Crestron Control System."**

Alexa is unable to detect a control system. Contact your CTP to resolve the connection.

### **"Control System response failure."**

Alexa is unable to establish a connection with the control system. Contact your CTP.
